Portfolio: nextjs-ai-app-pi.vercel.app | Bangalore, Karnataka

PROFESSIONAL SUMMARY

Senior Frontend Engineer with 5+ years building production web applications across healthcare, edtech, e-commerce, and enterprise software. Specializing in React, Next.js, TypeScript, and AI application development using Vercel AI SDK. Experienced in building automated test suites with Playwright and WebdriverIO, with hands-on expertise in CI/CD integration. Currently building AI-powered applications including streaming interfaces, multi-modal AI, agentic AI with LangChain, and structured data extraction.

EXPERIENCE

Software Engineer | Prutech Solutions → John Deere India (Expert-Connect) | April 2025 – Present | Bangalore

- Migrated entire test suite from WebdriverIO to Playwright, implementing 180+ automated test cases covering critical business flows and edge-case scenarios
- Improved regression testing efficiency by 60% through comprehensive automated test coverage across the ticketing management platform
- Integrated automated test suite into CI/CD pipeline using GitHub Actions, eliminating manual testing bottleneck and reducing deployment risk
- Exploring AI-powered testing using Playwright MCP to automate test generation and adapt to UI changes intelligently
- Collaborated with backend and product teams to identify edge cases, improve test coverage, and ensure production quality

Programmer | Dotsquares Technologies | July 2024 – Feb 2025 | Jaipur

- Developed E-Consult — a real-time doctor-patient consultation platform with video calling, appointment booking, and seamless doctor-patient interactions using Next.js, TypeScript, and Socket.io
- Built Downtime Trace — a hospital maintenance management system for tracking medical device repairs and reducing operational downtime
- Implemented Next.js and TypeScript architecture ensuring high performance, modularity, and maintainability across both platforms
- Collaborated with cross-functional teams including UI/UX designers and backend developers to deliver production-ready healthcare solutions

Software Engineer | eBizneeds Business Solutions | Oct 2022 – July 2024 | Jaipur

- Led front-end development for Edprime ERP system — an education management platform serving thousands of students and administrators
- Developed Library Module — an online library management system streamlining book transactions for students and staff with intuitive admin interfaces
- Built Protogen Module — an automated code generation tool reducing redundant CRUD coding effort and accelerating development workflow
- Implemented unit and integration testing, conducted thorough code reviews, and developed reusable React components for long-term scalability
- Optimized front-end performance, reducing load times and improving user experience across the platform

Software Engineer (JavaScript) | Sarvika Technologies | Sept 2020 – June 2022 | Jaipur

- Developed custom e-commerce merchandise stores for high-profile clients including Deloitte, Global Trident, Seafoods Gear, Proofpoint Swag Store, and Bobcat Store
- Built scalable, maintainable component architecture ensuring long-term stability across multiple client projects simultaneously
- Awarded Employee of the Month (Feb 2022) for exceptional project contributions and client satisfaction
- Provided technical support and troubleshooting, maintaining strong client relationships across the portfolio

PROJECTS

Next.js AI SDK Playground | Next.js 14, Vercel AI SDK, TypeScript, OpenAI, Upstash Redis | Oct 2026 – Present

- Built production AI application exploring multiple AI patterns: streaming chat with token tracking, multi-modal (text + image), structured data extraction, completion endpoints, and raw streaming
- Implemented real-time token-by-token streaming using Vercel AI SDK with proper error handling and TypeScript throughout
- Added production-grade rate limiting with Upstash Redis (10 requests/user/day) and OpenAI spending caps to protect API costs

Live: nextjs-ai-app-pi.vercel.app | GitHub: github.com/piyushSharma97/nextjs-ai-app

E-Consult | Dotsquares | React 18, Next.js, TypeScript, Socket.io | Sept 2024 – Nov 2024

- Spearheaded development of real-time doctor-patient consultation platform with video calling and online appointment booking
- Implemented WebSocket-based real-time communication using Socket.io for seamless live consultations

Library Module — Edprime | React.js, TypeScript, Redux | Oct 2022 – April 2023

- Developed online library management system streamlining book transactions for students and staff with intuitive admin interface
- Implemented state management with Redux for efficient data handling across complex library operations

Password Management | JavaScript, Node.js, JWT, MongoDB, EJS | Jan 2021

- Created secure password manager with authentication, role-based access control, and encrypted storage

GitHub: github.com/piyushSharma97/Password-management

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python (learning)

Frameworks: React 18, Next.js 14 (App Router), Redux Toolkit, SCSS

AI / GenAI: Vercel AI SDK, OpenAI API, LangChain (learning), Agentic AI (learning), RAG (learning), MCP (learning), Streaming UI, Multi-modal AI

Testing: Playwright, WebdriverIO, GitHub Actions CI/CD, Playwright MCP (exploring)

Tools: Git, VS Code, Vercel, Upstash Redis, REST APIs, JWT, Socket.io

Other: Agile/Scrum, Code Reviews, Junior Developer Mentoring, Responsive Design

EDUCATION

B.Tech, Computer Science | Arya College of Engineering and I.T, Jaipur | 2015 – 2020

ACHIEVEMENTS

- Employee of the Month — Sarvika Technologies, February 2022
- Successfully migrated 180+ test cases from WebdriverIO to Playwright, improving regression efficiency by 60%
- Delivered real-time healthcare consultation platform handling live video calls and concurrent users
